A CONSUMER INSIGHT. A BUSINESS TO TEST.

Good memories. Made tangible.

Squishies, slime and the working adults rediscovering their childhood wishes.

REPLAY LAB

Co-designed objects. Personal meaning. Viable small batches.

THE MEMORY ARCHIVE

A small object. A familiar feeling.

A revival worth investigating.

25 JUN 2026

Sampheng

A vendor described working adults returning to childhood wishes.
Social reviews helped renew attention.

19 JUN 2026

Mega Plaza

A broader squishy revival was reported.
Observed customers were mainly children and teenagers.

Two local reports. A reason to study the segment, not a market-size estimate.

S1 / Thai PBS World · S2 / Thairath. June 2026 reporting does not prove continuing growth in October.

The toy is familiar.
The buyer’s situation has changed.

THEN / A CHILDHOOD WISH

A wish out of reach.

A desired toy, without the money
to choose it independently.

NOW / ADULT SPENDING POWER

A choice within reach.

A vendor described working adults
returning to toys they once wanted.

The opportunity starts with a change in spending power, not a new type of toy.

S1 / Thai PBS World, 25 Jun 2026. Local reporting; adult market size and current growth remain unknown.

A local interview.
A signal of adult interest.

INTERVIEW / PARAPHRASE

Working adults also come to squeeze and play.

Reported by the interviewee.
No customer count supplied.

01 **Source**

Informal interview at a market near my internship.

02 **What it suggests**

Adult interest in touching and trying the toys.

03 **What remains unknown**

Purchases, nostalgia and change in demand over time.

S6 / Personally collected interview, paraphrased in English. A qualitative account, not a measured trend.

Design for a specific buyer.

TARGET TO TEST

Early-career Thai adults.

Currently working.
Buying for their own use, enjoyment or collection.

Buying context

Their own disposable income and personal choice.

Desired relevance

A childhood reference that feels personally meaningful.

Use context

A small object for a desk, display or everyday break.

Proposed audience and use cases. Confirm working status, purchase purpose and real preferences in fieldwork.

Memory can change what a toy is worth.

01

Memory

A familiar object carries personal meaning.

02

Enjoyment

The sensory experience is part of the appeal.

03

Choice

Adult income creates room for personal choice.

Hypothesis: a meaningful design could increase preference. Test it with buyers.

S1 / Reported childhood wishes. S6 / Reported adult play. Motives and price premium still need testing.

Discovery gets attention.
Meaning may explain the purchase.

REPORTED

See it.

Influencer and celebrity reviews bring the toys back into view.

→

INTERPRETATION

Relate to it.

Adult enjoyment may make the purchase feel acceptable.

→

STILL TO TEST

Choose it.

Interest needs to survive a real product and price.

Demo votes measure engagement. A real purchase test still needs to follow.

S1 / Reported social discovery supports the first stage. The remaining stages are hypotheses to test.

THE CUSTOMER JOB / HYPOTHESIS

Bring a familiar memory into my everyday life.

Meaning

A reference I recognise.

Choice

Details I can make my own.

Confidence

A clear sample, price and terms.

A shared memory.
A personal object.

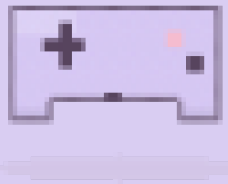

Choose a familiar shape.
Make the colours, feel and story your own.

01 / AFTER SCHOOL

Pencil-case squishy

02 / SATURDAY MORNING

Gamepad squishy

03 / THE CORNER SHOP

Cloud slime

Start with a small range of shared shapes to keep production manageable.

S2 / Sensory product context. These are proposed collection themes, not observed customer preferences.

Four choices. One personal object.

01

Shape

Squishy or slime.
A shared starting shape.

02

Colour

Main and accent colours.
A pattern that feels yours.

03

Feel

Texture, scent and sound.
A quiet, unscented option.

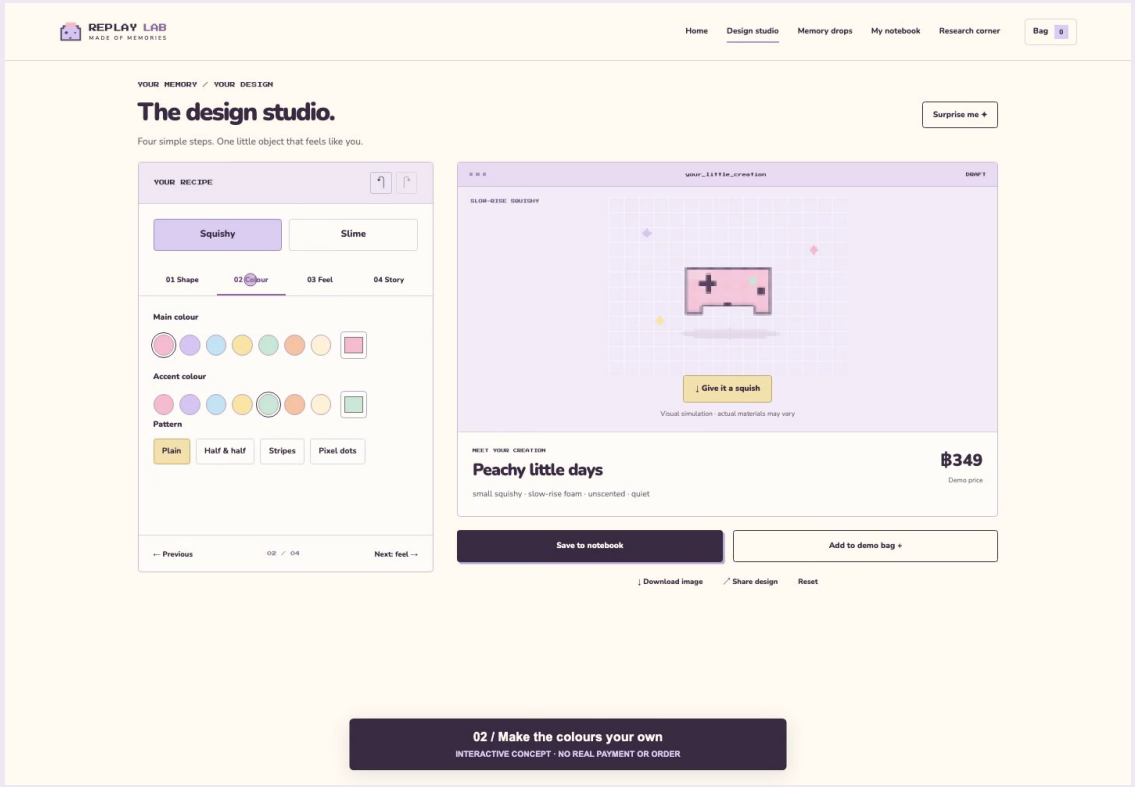

04

Story

A name and memory.
Save, share or export.

The web preview shows design intent. Physical materials still need supplier samples.

From a memory to a viable batch.

PLAY 25-SECOND ORDER DEMO

01 **Design**

Choose type, colour, feel and story.

02 **Save & share**

Keep the design. Share its appearance.

03 **Validate the batch**

Check samples, supplier costs and orders.

04 **Produce or refund**

Proceed only under clear, viable terms.

Live prototype: https://blimmy.github.io/replay-lab/ / Local demo only. No real payment or production order.

Personal meaning. Manageable production.

SHARED BY THE COLLECTION

One core recipe

Childhood theme
A small set of shapes
A checked supplier process

CHOSEN BY THE CUSTOMER

Your personal details

Colour and texture
Name and memory card
The story behind the object

Revenue: product sales. Launch with one collection before adding complexity.

S5 / Custom squishies already exist. Proposed focus: Thai childhood memories, adult use and co-designed batches.

Sell the object.
Keep the options focused.

01

Squishy

THB 349

02

Slime

THB 299

03

Optional details

+ THB 20–100

Illustrative website prices. Revenue comes from product sales, including chosen upgrades.

Size +50/+100 · Finishing touch +20 · Gift sleeve +40. Demo assumptions; actual price and delivery costs need validation.

Three risks. Three practical tests.

RISK	TEST BEFORE LAUNCH	LOOK FOR
Price resistance	Compare a prototype at the proposed price.	Preference at a viable price.
Production complexity	Limit options; check a supplier-made sample.	Consistent quality and realistic lead time.
One-time nostalgia	Ask about future use and reasons to buy again.	A credible reason for repeat interest.

Quality context: OCPB reported incomplete labels at some Mega Plaza sellers in June 2026.

S4 / Product and supplier information need checking. The report concerns some sellers, not every squishy.

Make the batch pay for itself.

PER SQUISHY / PLANNING ASSUMPTIONS

THB 349

Illustrative selling price

Variable cost

Materials, making and other per-unit costs.

Contribution

Amount left to cover fixed setup costs.

ILLUSTRATIVE BATCH

30

units to cover setup

THB 4,500 ÷ THB 150

The actual threshold must also meet supplier minimums.

All figures are assumptions. Verify every cost, supplier MOQ and willingness to pay before real pre-orders.

Ask. Observe. Then commit.

01	**Buyer interviews**	Ask about the last actual purchase, then memory and discovery.	A grounded consumer explanation.
02	**Concept & prototype**	Show the idea after behaviour questions. Compare the design at a viable price.	Preference, concerns and usability.
03	**Supplier & purchase test**	Confirm samples, costs and terms before accepting real pre-orders.	Quality and credible paid demand.

Convenience interviews and stated intention are exploratory. Demo reservations are not real sales.

Start small. Earn the next batch.

Test one collection with working adults.
Let weak results change the idea.

Explore the prototype →

01 **People choose it.**

At a price the business can sustain.

02 **Quality is consistent.**

The sample matches the promise.

03 **The batch pays.**

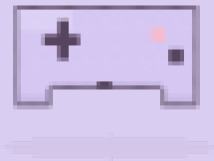

Confirmed orders cover the viable minimum.

Next step / Extend the initial interview with adult-buyer research, concept testing and supplier checks.
